Actis Technologies - Mobile Videoconference Unit

Thursday, October 22, 2009, 15:00 Hrs [IST]

Actis Technologies has developed a Mobile Videoconference Unit (MVU Series). The MVU series will offer users flexibility to conveniently move the mobile unit to any meeting room within the organisation's premise. The Actis MVU series are self sufficient and integrated video conferencing systems and contains a pre-wired unit mounted on a trolley with castors for easy mobility. The MVU series provide high definition (HD) video quality (720p at 30/60 fps, 1080p at 30fps, 16:9 format), a self-contained integrated display, camera, codec, microphone and speakers. It also features a mobile trolley (with castors) and also a pre-configured set up to make video conference (VC) calls with ISDN and IP support. The MVU series will be available in four models shortly; MVU-100P is a single display system for point-to-point video conference calls;

the MVU-1100MP is a single display system for multi point (four party) VC calls while the MVU-2000MP and MVU-2100MP supports dual display with multipoint VC calls.
