Facilitating crisis response processes  
and strategic decision making at Transocean

Dealing with crisis situations is an every-day possibility in deep-sea drilling scenarios that Transocean's team specialises in. This requires infrastructure that can bring critical information online quickly to enable efficient and appropriate decisions when they matter most.

# The Challenge

Transocean believes in a quality system that promotes and maintains service quality and facilitates continuous improvement within each business process.

The challenge for Actis, was to ensure that technology enabled quick and comprehensive reactions in critical situations - by providing functionality in a convenient and user-friendly manner. Transocean also wanted to build a system for better collaboration in meeting rooms across the organisation

As the world's largest offshore drilling contractor, Transocean is the world's largest and the leading provider of drilling management services worldwide. Their emphasis is on providing solutions and equipment for the more technically demanding segments of the offshore drilling business.

# facilitating crisis response

# The Solution

**Boardroom** with Video Wall

The Professional Services Group at Actis carefully evaluated Transocean's requirements and recommended appropriate solutions to meet these.

One of the key solutions is a **Multi-purpose Boardroom aka Emergency Response Room**. This innovative room features an advanced Video Wall which can be used for audio-video conferencing or presentations. The room is also equipped with a **document camera to help view 3D objects** and paper documents through a display system. It has lighting control, which adapts room lighting for meetings or presentations as required.

The Boardroom transforms into an Emergency Response Room to handle mission critical emergencies. In this scenario the **Video Wall allows multiple participants to run applications simultaneously**, enabling quicker collaboration. The system also allows Transocean to keep digital records of important meetings by recording the proceedings in high-quality video and audio.

Other solutions consist of Meeting rooms and Training rooms which are equipped with **lighting control, projection screens, high-end displays and audio/video conferencing systems**. Room Schedulers integrated with the companies mailing / calender system ensure that Meeting rooms or Boardroom bookings are managed without conflict.

# The Result

Crisis response depends on the availability of quality information and the ability to quickly and reliably share it with the people who have the experience to use it effectively. The solutions provided by Actis enabled strategic decision making, by enhancing the ability of key managers to collaborate.

The result is an intuitive and robust platform to make better collaborative decisions possible at Transocean.

“*Actis' end-to-end solutions helped Transocean gear up to serve the challenges in the AV space.*”

Prasanna Gaokar  
IPS Manager, Transocean
